## INTRO

Software engineer with 4+ years of experience in the travel-tech industry, working closely with Product, Design and Backend teams to deliver customer-facing solutions. Experienced in cross-functional collaboration, technical coordination and translating business requirements into scalable implementations. Strong analytical and communication skills with a product-oriented mindset.

## EXPERIENCE

**Sembo | Stena Line**

**Front-end engineer (Inspire team)**

10/2024 – 02/2026 | Palma de mallorca

- Developed and delivered prioritized product features using React, Next.js and TypeScript, collaborating with Product and Design during refinement to align implementation with business goals.
- Integrated headless CMS workflows and improved platform visibility by optimizing SEO indexing and achieving full accessibility compliance.
- Partnered with the architect, engineered advanced caching strategies (Redis/ S3) and implemented automated cache invalidation via Sanity webhooks to ensure real-time content synchronization. • • Front-end developer (Plan team)
- Collaborated as technical point of contact between Product, Design and Marketing, supporting experiments and coordinating with backend and data teams.
- Designed and implemented API endpoints using Express, TypeScript, Zod and MySQL to support frontend requirements.

**Front-end developer (Plan team)**

03/2022 – 09/2024

- Built booking, search flows and **core features** using **Vue 3, TypeScript, and Pinia**.
- Partnered with **UX/UI and Backend** to translate designs into production-ready frontend features.
- Improved code maintainability by implementing **Clean Code** patterns, strict linting (**ESLint/Prettier**), and a robust unit, integration and end-2-end testing **Vitest/Cypress** suite.
- Redesigned the **Google Maps API integration** request strategy, achieving a **38% reduction in operational costs**.

**Electrical Engineer,** *Spark Iberica | Omexom & Autosolar*

09/2019 – 06/2021 | Palma de mallorca

- Developed internal automation tools using VBA

## TECHNOLOGIES

**Front-End:** React | Next.js | Vue 3 | TypeScript | Vite | PNPM

**Styling and UI:** Sass | TailwindCSS | Storybook | Accessibility (WCAG)

**Quality:** ESLint | Prettier

**Testing:** Vitest | Playwright

**Data:** Sentry | Web Vitals | Statsig | Redis | Grafana | Kibana | Elasticsearch

**Backend:** C# | DotNet | Python

**Infraestructure:** Docker | Jenkins | AWS

**Operations:** Docker | Jenkins | Slack | Git

## LANGUAGES

**English** — C1

**Spanish**

**Catalan**

## EDUCATION

**Electronics and Computer Engineering,** *UIB*

2015 – 2019
